

MetroLink™ Wireless Broadband Solutions

MetroLink™ is the ideal wireless broadband solution for connecting multi-branch city networks.

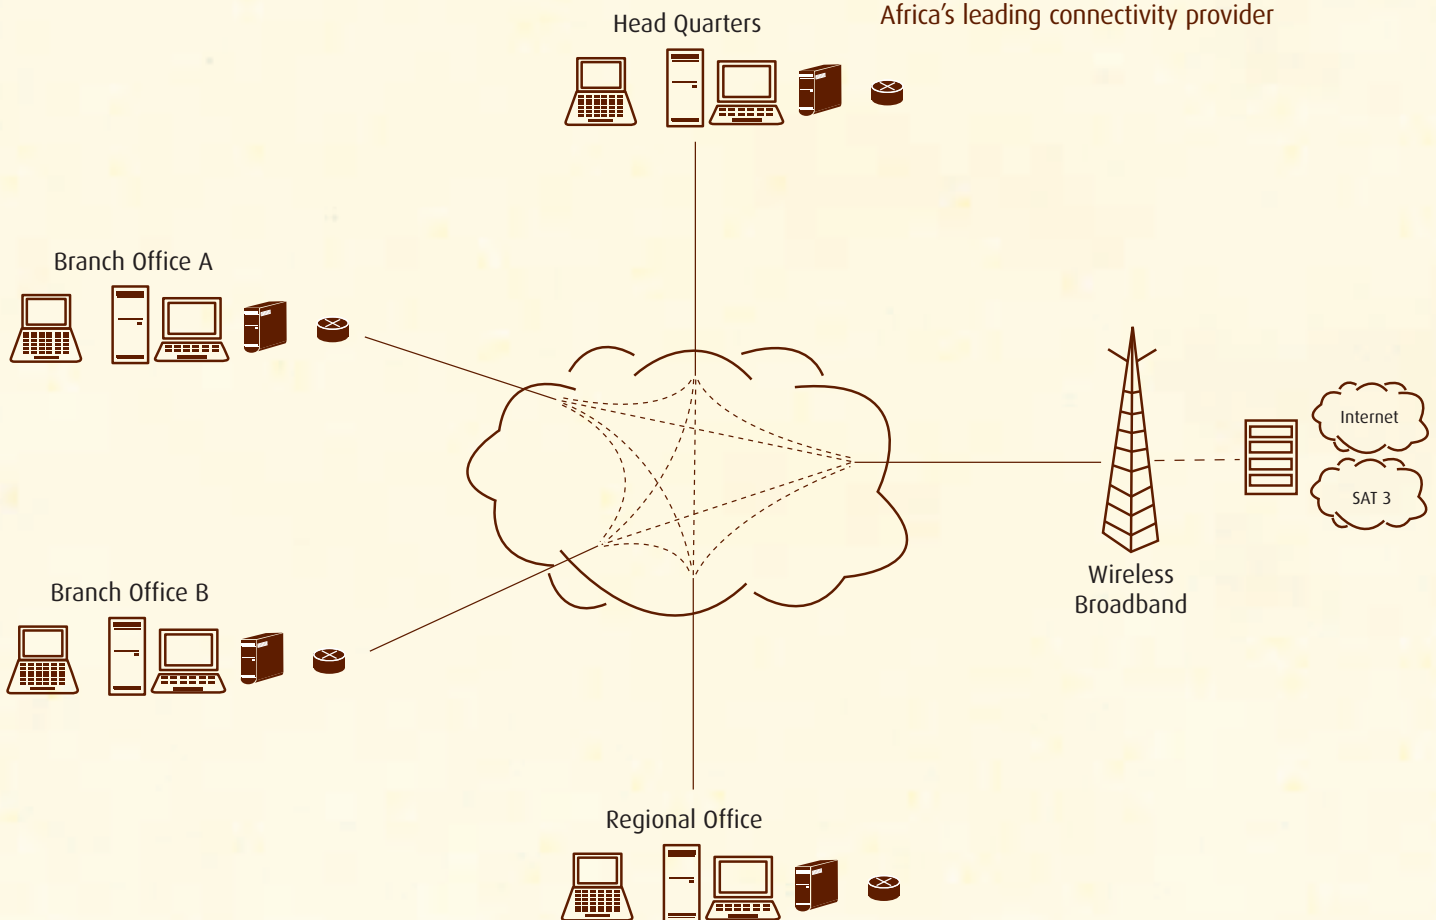

It provides secure and reliable high speed broadband connections between any sites on your branch network. The larger your network, the more you'll save on ICT.

Whether your network spans between two branches or across a whole city, MetroLink™ is flexible enough to grow with you as your business expands.

The benefits to your business

- Full mesh connectivity allowing any-to-any links between your branches
- True broadband from 512Kbps to 10Mbps connectivity per site
- Avoid making bandwidth versus cost compromises when implementing your enterprise-wide applications
- Easy and quick set up, your branches are online within hours
- High reliability, no more revenue loss from frequent cable cuts
- Internet support to each branch using the same CPE
- The confidence in having the care and support of Africa's leading connectivity provider

What our service offers

- Extensive citywide coverage for short line-of-sight radio deployments
- NCC licensed 10.5GHz band, no interference excuses
- Network security guarantee using Multiprotocol Label Switching (MPLS), no need for VPN cryptology
- Prioritise your enterprise applications for efficient bandwidth usage
- Single solution for Intranet, Internet and Extranets on the same CPE
- Access to Gateway's fiber and VSAT global connectivity networks

Want to discuss how MetroLink™ can support your rapidly growing business?

- Call your local Gateway representative shown on the back cover
